## ABSTRACT

Census of Population, 1980: Equal Employment Opportunity Special File Supplements I: Towns/Townships and II: MSA'S /PMSA'S/CMSA'S Microfiche [microform] / prepared by the Bureau of the Census.--Washington: The Bureau [producer and distributor], 1984

### TYPE OF FILE:

Summary Statistics.

### UNIVERSE DESCRIPTION:

All persons in the civilian labor force in the United States.

### SUBJECT-MATTER DESCRIPTION:

Both files contain two tables. Table 1 is detailed occupation (514 categories) by sex. Table 2 is years of school completed by age and sex. Both of these tables appear for twelve groups. These groups are as follows: (1) All Races; (2) Hispanic; (3) White, not Hispanic; (4) Black, not Hispanic; (5) American Indian, Eskimo, and Aleut, not Hispanic; (6) Asian and Pacific Islander, not Hispanic; (7) Other not specified Races, not Hispanic; (8) White; (9) Black; (10) American Indian, Eskimo, and Aleut; (11) Asian and Pacific Islander; (12) Other not specified Races.

### GEOGRAPHIC COVERAGE:

Supplement I provides EEO data for the towns and townships with population of 50,000 or more in six states: Connecticut, Massachusetts, Michigan, New Jersey, New York and Pennsylvania. With the exception of Connecticut and New York, data are not shown for a town if it is coterminous with a place. These data can be found in the place summaries contained on the original file.

Supplement II provides EEO data for 333 areas. These include 317 of the 351 metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's) that were defined by the Office of Management and Budget on June 30, 1983. The 34 areas not shown are all in New England. For New England, the file contains 16 New England county metropolitan areas (NECMA's).

### TECHNICAL DESCRIPTION:

The documentation is in 24X reduction source document format. Each fiche consists of an eye-readable title and a maximum of 98 data frames. Each frame has a maximum width of 80 characters and a maximum depth of 64 lines.

The tables are in a 42x reduction COM (computer output to microfiche) format. Each file consists of an eye-readable title, a maximum of 204

data frames, two information frames, one blank frame, and an index frame. Each frame has a maximum width of 132 characters and a maximum depth of 64 lines.

Supplement I shows data for 66 geographic areas; the entire file is contained on 23 microfiche. Supplement II shows data for 333 geographic areas; the entire file is contained on 111 microfiche.

**REFERENCE MATERIALS:**

METROPOLITAN STATISTICAL AREAS, 1984 Office of Management and Budget.  
To be published June, 1985.

**RELATED MACHINE-READABLE DATA FILES:**

Both files can be purchased on one reel of tape at 6250 b.p.i. or two reels at 1600 b.p.i. Supplement I (for townships) is available on one reel at 1600 b.p.i.

**MICROFICHE AVAILABILITY:**

Attachments 1 and 2 list the areas summarized in Supplemental Files I and II, respectively. In addition, each attachment indicates the microfiche identification number for each geographic area.

## Introduction

This documents the 1980 Equal Employment Opportunity supplemental products that were created after the release of the original 1980 Equal Employment Opportunity Special File Microfiche in 1984 .

Because these supplemental files are virtually identical to the original microfiche in content and data structure, the user should refer to the technical documentation that was prepared for the original computer file to resolve questions regarding:

- (1) comparability of 1980 data to 1970 data;
- (2) file structure;
- (3) data suppression;
- (4) sample design and related sampling error;
- (5) detailed occupational categories;
- (6) microfiche description.

Like the EEO Special File, Supplements I & II contain summary statistics for all persons, 16 years old and over, in the civilian labor force. Tables 1 and 2 present detailed occupation (514 categories) data by sex, race and Spanish/Hispanic origin; and Tables 3 and 4 present years of school completed by age data by sex, race and Spanish origin.

In fact, the supplemental files differ from the original file only in the level of geographic summarization.

## Description of Supplemental File I

Attachment 1 lists all the geographic areas contained on this file.

This supplement contains EEO data for the towns and townships with a 1980 Census population of 50,000 or more in six states: Connecticut, Massachusetts, Michigan, New Jersey, New York and Pennsylvania. Some of the towns in Connecticut coincide with the places already on the original EEO special file, and the boroughs of New York City are on the original file as counties. For the other four states, however, there will not be an overlap. The other New England states, namely, Maine, New Hampshire, Rhode Island, and Vermont did not have any towns with populations of 50,000 or more that were not already designated as places on the original EEO file; for this reason these states are not represented on this supplement.

## Description of Supplemental File II

Attachment 2 lists all 333 areas contained on the file.

The original 1980 Equal Employment Opportunity special file microfiche has summaries for the 323 SMSA'S that were defined for the 1980 Decennial Census Publication Program. These definitions were as of June 30, 1981.

On June 27, 1983, the Office of Management and Budget announced new definitions of metropolitan areas based upon a review of final 1980 census results and implementation of new standards for defining metropolitan areas that were adopted in 1980.

These new standards were implemented to meet the needs of various groups of users by providing for a flexible structure of metropolitan definitions by creating three sets of areas: metropolitan statistical areas (MSA'S), primary metropolitan statistical areas (PMSA'S), and consolidated metropolitan statistical areas (CMSA'S). For New England an alternate definition called New England county metropolitan areas (NECMA's) was also developed. Flexibility is further enhanced by classification of the areas into four levels based on total population size--Level A with 1,000,000 or more; Level B with 250,000 to 1,000,000; Level C with 100,000 to 250,000; and Level D with less than 100,000.

MSA'S are relatively freestanding and not closely associated with other metropolitan statistical areas. These areas are typically surrounded by nonmetropolitan counties. Areas qualifying for recognition as metropolitan statistical areas have either a city with a population of at least 50,000 or a Bureau of the Census urbanized area of at least 50,000 and a total metropolitan statistical area population of at least 100,000.

In areas with over 1 million population (Level A areas), PMSA'S may be identified. These areas consist of a large urbanized county, or cluster of counties, that demonstrates very strong internal economic and social links, in addition to close ties to neighboring areas.

When PMSA'S are defined, the large area to which each PMSA belongs is designated a CMSA. The new definitions include a set of New England metropolitan areas in county terms for use when subcounty data for New England cannot be obtained. These 16 New England county metropolitan areas are on the file. The file does not contain the MSA'S, CMSA's and PMSA's located in New England. Among the areas excluded are the four Connecticut PMSA's (Bridgeport-Milford, CT; Danbury, CT; Norwalk, CT; and Stamford, CT) that are part of the New York-Northern New Jersey - Long Island, NY-NJ-CT CMSA.
